

The Design Manual

2nd Edition

Contents

Preface

Acknowledgments

PURPOSE

What does design do?

Good design

Audiences

Styling

Real communication

Clarity

Words

How we read

Multiple entry points

Hypertext and film technique

Visual processing

Visual literacy

Using metaphors

Why print?

Why personalise?

How do you maximise the power of paper?

Any color as long as it's green

What decisions can help reduce the environmental impact of print?

But it's not just print

Designing for international audiences and cultural difference

Accessibility

PROCESS

The design process

Briefing

Research

Conceptualisation and idea generation

Testing

Prototyping

Presentation

Approvals

Production management

Launch

Evaluation

Design effectiveness

PROJECTS

Publications

- Books, reports and annual reports
- Newsletters, journals and magazines
- Pamphlets and brochures
- Catalogues
- Menus
- Programs
- Orders of service
- Comics and graphic novels
- Proposals

Corporate identity and branding

- Brand evolution
- A design audit
- Identifiers
- Corporate typefaces
- Corporate colour palette
- Attitude
- Corporate identity manual
- Stationery
- Forms
- Signage
- Exhibitions, trade shows and conferences

Screen-based media

- Multimedia
- Websites
- Email newsletters, e-books and e-zines

Advertising and marketing

- Posters
- Postcards
- Flyers, information sheets and handbills
- Small-space press ads
- Classified ads
- Magazine and display ads
- Direct-mail advertising
- Packaging

PRODUCTION

Layout

- Eye flow
- Spatial relationships
- Dominance
- Simplicity
- Unity
- Balance
- Freestyle layout
- Grids
- Formats
- Imagery
- Contrast
- Scale
- Tone
- Repetition, pattern and texture
- Direction
- Borders and rules
- Space and pace

Traditional and modern layouts

Four ways to save a failing design

Typography

- Type categories
- Typefaces, families and fonts
- Type selection
- Leading/linespacing
- Letterspacing
- Using type variation
- Punctuation
- Text formatting
- Page furniture
- Display type
- Style sheets

Colour

- Colour coding

Colour systems

- The problem
- Halftones, stipples, screens and reverses
- Limited colour
- Process colour (CMYK)
- Pantone colour system
- Proofing systems
- RGB and hexadecimal colour

Prepress

- Finished artwork preparation
- Trapping
- File management
- Imposition
- Output resolution
- Proofing

Printing

- Offset lithography
- Screenless printing/collotype
- Laser printing, photocopying and xerography
- Digital printing
- 'On-demand' or 'just-in-time' printing
- Variable data printing
- Lenticular printing
- Letterpress
- Gravure
- Engraving
- Screen printing
- Flexography
- Selecting a printer
- Identifying the cause of print problems

Paper

- Paper specification
- Uncoated and specialty grades

Finishing processes and embellishment

- Varnishes
- Coatings
- Folding
- Guillotining/trimming/drilling
- Collating and gathering
- Numbering
- Binding
- Office binding styles
- Craft bindings
- Foils
- Embossing and debossing
- Thermography
- Die-cutting, scoring and perforation
- Laser cutting
- Pop-ups

PROFESSIONALISM

- Using a designer
 - Selecting a contractor
 - Commissioning a contractor
- A career in design
- Creativity
- Studio management
- Ethical considerations
